

Invetech is an innovator in new product development, custom automation and contract manufacturing.

For over 30 years we have developed breakthrough products and manufacturing systems with a focus on disruptive innovation. This has seen us deliver over 5000 projects in the following markets.

Diagnostics

Laboratory, point of care and home testing.

Bio-Rad

Life Sciences

Pharma, biotech, research and cellular processing.

TearLab

Medical Devices

Therapeutics and patient monitoring.

The Coca-Cola Company

Industrial Products

Instrument, dispensing and delivery systems.

Bayer

Consumer Products

Consumer devices and domestic products.

Reckitt Benckiser

Cleantech

Products for the sustainable management of energy and natural resources.

Design

Engineer

Manufacture

We combine front-end design skills with engineering and manufacturing capability, to bring new products to market faster. This end-to-end approach requires a team with great breadth and depth in highly specialized disciplines.

Our team of over 200 professionals includes industrial and CAD designers, model makers, mechanical, electronic, software and manufacturing engineers, bioscientists, physicists, chemists, technicians and program managers.

It is this diversity of talent and thinking that differentiates Invetech and defines the essence of our company.

Look, think and act from a different point of view.

Clients Include:

Abbott Diagnostics
Ansell
Bayer
bioMérieux
Bio-Rad Laboratories
Boots Healthcare International
Cadbury Schweppes
Cochlear

GlaxoSmithKline
Leica
MDS Analytical
Micronics
Nanosphere
National Foods
Radiometer
Reckitt Benckiser

ResMed
Roche
Scholle
Shell
Shimadzu Medical Systems
StemCell Technologies
Sunbeam Victa
Sysmex

TearLab Corporation
The Coca-Cola Company
Unilever
Visy Industries
Wako Pure Chemical Industries
Whirlpool
Xtralis
