## **Invetech Showcases its Integrated Contract Development Services on Booth #4118 at AACC 2007**

(SAN FRANCISCO, CA – April 20 2007) Invetech, an international specialist in instrument development and custom automation, will be exhibiting its complete integrated contract development and manufacturing services at the annual AACC meeting in San Diego, July 15 - 19. Invetech will showcase its range of services for instruments, disposables and custom automation on booth #4118.

By working collaboratively with companies, Invetech devises solutions for manufacturers of equipment and consumable goods and end users in in-vitro diagnostics, point of care technology and life sciences. The company has successfully delivered projects for 7 of the world's top 10 clinical diagnostic companies. At AACC, Invetech will be discussing its practical, results-focused approach with outcomes which are highly reliable, easy to use, maintain and service.

Invetech's booth offers the opportunity to learn more about its experience and applications in clinical in-vitro diagnostics, clinical pathology as well as in the development of compact instruments. Visitors will also be able to discuss Invetech's innovative solutions and turnkey approach with the specialists on booth.

The AACC meeting is an annual event for industry professionals involved performing, directing, interpreting or developing clinical laboratory testing. AACC is expected to attract around 20,000 participants and nearly 700 exhibitors from all round the world.

Invetech is an engineering services company with extensive experience in solving automation challenges for laboratories and instrument companies working in point of care diagnostics, molecular diagnostics, life sciences and pharmaceutical/biotech laboratories. With a track record in improved reliability, durability and system throughput, the company's expertise crosses a number of disciplines crucial to the drug discovery process including high-value added disposables, DNA extraction, bead handling, liquid handling, plate handling, robotics, software interfaces, optics, specialized detection systems, miniaturization and integration.
