

Invetech Presents its Complete Range of Medical Device Solutions at MEDICA 2007

(SAN FRANCISCO, CA – 7th November 2007) Invetech, a specialist in development of biomedical products, instruments and custom automation, will be showcasing its innovative range of medical device solutions at MEDICA, 14-17 November 2007 at the Düsseldorf Exhibition Centre, Düsseldorf, Germany. Invetech will be exhibiting its integrated service solutions on booth #C11, Hall 3.

In an evolving medical devices marketplace, rapid development is critical to commercial success. Invetech offers for the first time its integrated turnkey product and production equipment development service with rapid "time to market" results. Its offering consists of both integrated design, supported by manufacturing system development. Invetech's development team delivers flexible development processes which are compliant with FDA Quality System Regulation 21 CFR, part 820 (which ensure the manufacture of safe and effective medical devices).

Invetech's medical device solutions range from advanced diagnostic instruments to simple home-use monitoring devices. Through this service, medical device businesses have the opportunity to outsource development and manufacture of their product. Not only does this service offer the development of any required consumables but also preparation of capital investment strategy, combined with design and build of automated high-volume manufacturing equipment.

Invetech works with a wide variety of customers and industry experts, providing them with the ability to outsource the development and manufacture of consumables and tools used by patients and medical professionals for surgical, monitoring and therapeutic purposes. This unique combined offering of product and manufacturing equipment provides a fast turnaround solution with a focus on the customer's business success.

Jari Palander, Vice President of North American Operations at Invetech, comments: "Invetech prides itself on providing cutting edge solutions to increase efficiency and reduce costs. MEDICA is the largest international Trade Fair for Medicine, and therefore provides us with the perfect opportunity to demonstrate to the industry the extensive benefits of our Medical Device Solutions."

Invetech is an engineering services company with extensive experience in solving engineering challenges for companies working in laboratory and point of care diagnostics, molecular diagnostics and medical devices. With a proven track record in enhanced reliability, durability and system throughput, the company's expertise crosses a number of disciplines crucial to biomedical applications including high-value added disposables, software interfaces, optics, specialized detection systems, DNA extraction, bead handling, liquid handling, plate handling, robotics, miniaturization and integration.

About Invetech:

For more than 20 years Invetech has been at the forefront of new product development and automation. With experience drawn from over 5,000 projects, Invetech delivers global contract design and development, contract product and instrument manufacturing and custom automation services to medical devices, life sciences, drug discovery and pharmaceutical companies, in addition to 7 of the world's top 10 clinical diagnostic companies.

Invetech combines its integrated in-house capabilities, specialist knowledge and diverse experience to deliver better solutions, in the shortest possible time and with less risk, to its clientbase of start-ups through to multinationals. Its commercial focus, responsive and flexible approach, and unbiased solutions, means clients get the best outcome with the aim of commercial success.
