

Invetech supports Medical Devices Industry growth at Medical Product Outsourcing Symposium

(Melbourne, Australia – May 2008) Invetech, specialists in breakthrough product development and custom automation for the medical, industrial and consumer markets, announces its involvement at the Medical Product Outsourcing (MPO) Symposium, San Mateo, California, May 21, 2008.

As leaders in their field, Invetech actively facilitate and promote the growth of outsourcing within the Medical Device Industry, providing expertise along the product development journey.

Senior members of the Invetech team will be available to discuss and provide tips for companies looking to develop innovative products and automated systems to achieve commercial success.

"Outsourcing relationships are critical to bringing new products to market. The Medical Product Outsourcing Symposium brings OEMS together with leading outsourcing service providers, to educate, to network and provide a forum for issues affecting the OEM-supplier relationship" said Howard Revitch, group publisher of Medical Product Outsourcing. "

"Invetech is delighted to be a part of the Symposium for the first time. Our approach to successful partnering, our extensive global experience and our broad industry exposure, enables us to educate and assist firms looking to launch new products and explore new market opportunities" said Jari Palander, Executive Vice President of Business Development for Invetech.

"Over the last 30 years we have worked on more than 5000 ground-breaking and award-winning developments. Our proven processes and deep market knowledge can assist emerging growth and start-up device manufacturers learn about the tools required to help their businesses grow" said Palander.

Invetech develops and manufactures devices, instruments, consumables and custom automation systems for companies across the world. With over 30 years' experience in outsourced product development, Invetech partners with leading brands and young start-ups to navigate product development challenges and deliver reliable and quality results to market.

The company's extensive experience covers a wide range of sectors including; medical devices, diagnostics life sciences, bioprocessing and drug discovery. With a proven track record of thousands of development projects worldwide, Invetech's services are increasingly relied upon by industry experts seeking an experienced outsourcing co-development partner.
